

D2.1. Performance and impact review of online platforms

OCTOBER 2022

www.regilience.eu

Project Acronym:	REGILIENCE
Programme	Horizon2020
Type of Action	Coordination and Support Action
Grant Agreement number	101036560
Start day	01/11/2021
Duration	48 months
Contacts	Indriany Lionggo – indri@ieecp.org Jen Heemann – jen@ieecp.org Guido Schmidt - guido.schmidt@fresh-thoughts.eu

Document information

Document Factsheet	
Full title	D2.1 Performance and impact review of online platforms
Work Package	WP2 Tools and Solutions for implementing innovation packages in regions
Task(s)	T2.1 Performance and impact review of online platforms
Author(s)	Tena Maruševac (REGEA), Tomislav Novosel (REGEA), Diana Guardado (F6S), Elena Blagoeva (F6S), Razvan Tosa (F6S)
Reviewers	Tiago Capela Lourenço (FCiências.ID), Guido Schmidt (Fresh Thoughts), Indriany Lionggo (IEECP)
Date	November 2022

Document dissemination Level

Dissemination Level	
X	PU - Public
	PP - Restricted to other programme participants (including the EC)
	RE - Restricted to a group specified by the consortium (including the EC)
	CO - Confidential, only for members of the consortium (including the EC)

Document history

Version	Date	Main modification	Entity
V0.1	24/10/2022	Draft version distributed for quality review	REGEA, F6S
V0.2	23/11/2022	Internal Quality review	FC.ID
V0.3	29/11/2022	Review by the project coordinator	FT, IEECP

About

REGILIENCE aims to foster the adoption and wide dissemination of regional climate resilience pathways, following a demand-driven approach and bearing in mind the expertise and knowledge acquired, as well as the solutions available from Innovation Packages and other sources. The project aims to support the Green Deal targets and communication by implementing Innovation Packages that will address key community systems and comprises the adaptation solutions and pathways deemed essential for climate and social resilience in the specific regional contexts and the set timeline. The REGILIENCE project aims to facilitate the replication of Innovation Packages in 10 vulnerable and low-capacity regions, additional to those targeted by the Innovation Package projects, after a selection process and the signature of a workplan agreement. This ambition is aligned with the Horizon Europe's proposed Mission "Prepare Europe for climate disruptions and accelerate the transformation to a climate-resilient and just Europe by 2030". It will implement the LC-GD-1-3-2020 RIA project results on the Innovation Packages.

The project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101036560.

Statement on mainstreaming gender

We acknowledge the need to mainstream gender aspects as a transversal aspect of the project's activities. The need for gender mainstreaming arises from persistent inequalities in power distribution and access to services and opportunities between people of different sex and/or gender identities. As demonstrated by literature and advocated in the European and international arena, this influences the understanding and perception of climate change dynamics and effects. Women and men, but also people in the LGBTQI+ community, are differently affected by the accelerated change of climate. Only by taking into consideration their diverse visions can scientific research reach meaningful and universal conclusions that properly inform climate action. For these reasons, the REGILIENCE consortium is committed to including gender and intersectionality as transversal aspects in the project's activities. In line with EU guidelines and objectives, all partners – including the authors of this deliverable – recognise the importance of advancing gender analysis and sex-disaggregated data collection in the development of scientific research. Therefore, they commit to paying particular attention to including, monitoring and periodically evaluating the participation of different genders in all activities developed within the project, including workshops, webinars and events but also surveys, interviews and research, in general. While applying a non-binary approach to data collection and promoting the participation of all genders in the activities, the partners will periodically reflect and inform about the limitations of their approach. Through an iterative learning process, they commit to planning and implementing strategies that maximise the inclusion of more and more intersectional perspectives in their activities. Within this deliverable, no specific gender-relevant aspect was identified.

Acknowledgements

We would like to thank everyone for contributing to the development of this deliverable, mainly the valuable input from the PentaHelix Climate Forum, CDP Europe, weADAPT, Climate Innovation Window, PROSPECT+, PreventionWeb and FEDARENE platform owners.

Executive Summary

REGILIENCE aims to foster the adoption and wide dissemination of regional climate resilience pathways, following a demand-driven approach and bearing in mind the expertise and knowledge acquired, as well as the solutions available from Innovation Packages and other sources. This document aims to analyse the existing platforms and choose the one(s) that can be best supported and turned into practical knowledge sources and tools for regions to assist them in implementing resilience pathways.

This task started with the whole REGILIENCE team coming together to deliver the initial list of 124 platforms. For those platforms, a multicriteria analysis was developed, which helped to select the 16 that entered the second phase and were contacted with the cooperation proposal. After several meetings, the result of this phase was 6 signed Letters of Cooperation (LOC). To the platforms that signed the LOC, an online survey was sent, which helped us to further analyse them, do a SWOT analysis, and to make the final decision, 2 platforms will be contacted with the possible upgrade suggestions.

1 Introduction

REGILIENCE aims to foster the adoption and wide dissemination of regional climate resilience pathways as well as to implement the LC-GD-1-3-2020 Innovation Action projects results on the Innovation Packages. To do that, we are reviewing and fostering synergies of online platforms to improve their performance and usability for regions and communities. Thus, this document aims to analyse the possible platforms and choose the one(s) that can be set up to act as a knowledge tool for regions to assist them in implementing resilience pathways, as stimulated by the Innovation Packages.

The review goes through the multi-criteria framework to evaluate and analyse the performance and impact of the existing knowledge-exchange platforms, considering the objectives and the transition pathways in the prioritised regions. There are altogether 4 Phases dedicated to choosing the most suitable platforms, all of which will be presented in the scope of this document. This report details the overall assessment results and the rationale behind the options. It serves as input into Task 2.2, Development of an online platform solution, providing guidelines towards the best course of action in developing a new or upgrading existing platform(s).

If not necessary, the REGILIENCE project does not intend to create a new platform that will serve just as a promotion platform during the project's existence but **will identify the best possibilities to increase the number of users of knowledge platforms compared to previous systems by 10%**. Our other goal is to increase knowledge platforms' usage **compared to previous systems by 20%**. To achieve that, we will select **5 suitable online platforms and upgrade the existing knowledge-exchange** by cooperation with the platform owners.

2 Methodology and Approach

This section, “Methodology and Approach”, aims to present the methodology formulation, the context, and the reasons behind the consortium’s decisions. The following section, “Platforms Assessment”, presents and explores the results of the methodology implementation.

To develop the methodology, the REGILIENCE consortium conducted intensive desk research on good practices for performance and impact review of online platforms. There have not been many literatures on the performance and impact of online platforms as this is a very specific area of knowledge. However, this work was essential to define the strategy of the assessment and definition of the expected results and was completed with quality and on time.

The approach to the platform owners was studied as well to keep them engaged and interested during the process. Being in direct contact with the platform owners allowed us to get insights on essential characteristics from an insider point of view, collecting, for example, platform statistics.

The primary scientific sources that support the overall of our methodology are listed in Table 1.

Table 1. List of the references relevant to creating REGILIENCE platform analysis methodology

Name of the Source	Brief summary	Added value to the methodology
Open Web Platform: Complete Self-Assessment Guide. Create Space Independent Publishing Platform [1]	This book explained the success criteria that can support if Open Web Platform objectives are being met and which benefits are delivered. It is a self-assessment tool and includes an extensive criterion grounded in the past and current successful projects and activities by experienced Open Web Platform practitioners.	This book supported the definition of the main dimensions, namely the Platform Statistics, Technical, Business, and Contextual dimensions, of the complementary questions to be assessed and the type of questions. The complementary questions are part of the third phase of the methodology, and platform owners are asked to give us their support by answering them.
Standardized Technology Evaluation Process (STEP) User’s Guide and Methodology for Evaluation Teams. The MITRE Corporation. [2]	This publication is a standardized Technology Evaluation Process that aims to provide meaningful steps to be used in a broad range of technologies evaluations, to achieve consistency, traceability, and defensibility of evaluation results. It also includes guidelines for goals definition and documenting findings. This process is FAIR (Findable, Accessible, Interoperable, and Reusable) and comprehensive.	This publication supports the definition of the high-level strategy of the methodology, namely the definition of phases and the involved team in each phase.
Monitoring methodologies for Web Accessibility in	This study was prepared for the European Commission DG Communications Networks,	This document is essential to have an overview of national monitoring methodologies and to understand

the European Union. [3]	Content & Technology and aimed to provide the state of the art of web accessibility monitoring in the EU, detecting the main trends and validating some existing national monitoring methodologies.	the results of the methodologies' validations. It also supports the definition of the dimensions of the complementary questions to assess the platforms in the REGILIENCE methodology.
A guide for selecting Monitoring and Evaluation Tools. [4]	This document gives an overview of Monitoring and Evaluation processes and guidelines to define a monitoring and evaluation plan, emphasizing the involvement of different stakeholders in the process.	REGILIENCE methodology is not an evaluation or monitoring process. However, this document was important for understanding the differences between the concepts and methodologies.
Web Platform Assessment Tools: An Experimental Evaluation [5]	This scientific article demonstrates a comparative analysis of four web platform assessment tools, focusing on accuracy. It is highly scientific and technical.	This paper was useful to support the technical assessment's definition and understand how deep it should go.
How to Evaluate Website Platforms [6]	This online article is a holistic overview of how to evaluate website platforms. It is a short article with simple terms and definitions. Very easy to read and focused on evaluation methods.	This article was important for defining the timeline to perform our platform assessment.
A primer on critical success factors [7]	This "old but gold" scientific article gives a very good overview on the "Critical Success Factors" (CSFs) introduced by the Harvard Business Review. It designs a structured technique to assist managers in CSFs interviews.	This article supported the definition of the 4 dimensions to assess of the complementary questions and the methodology structure.

On the other hand, having count the specificity of the project, and since we are not monitoring or evaluating the platforms, we tried to adapt the literature findings to our needs and expectations.

Following that, our Platforms Assessment and Support Methodology is divided into 6 phases. The first 4 phases are focused on the Platform assessment and are detailed explained in the scope of this document. Phase 5 and Phase 6 will follow after the platform assessment is completed. Figure 1 presents the phases of the methodology.

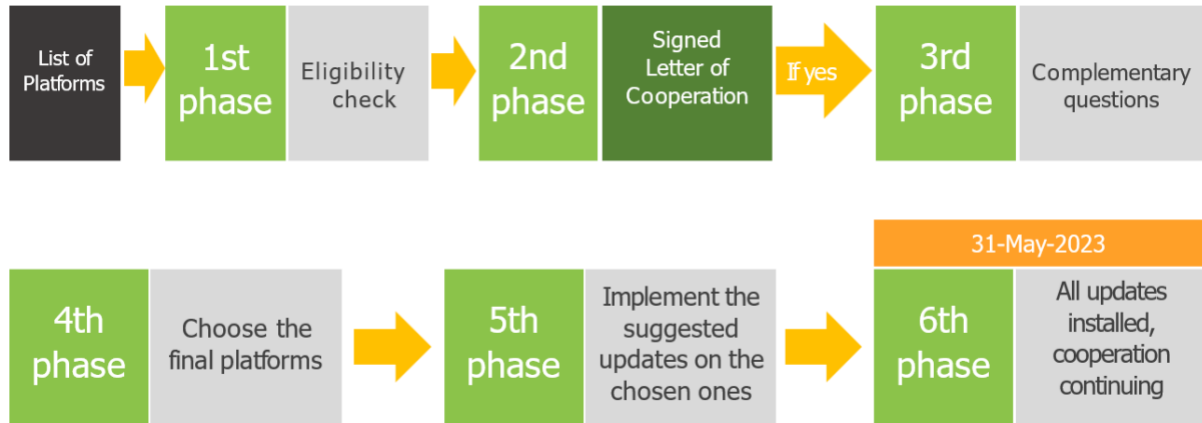

Figure 1. Platform Assessment and Support Methodology

In the next subsections we will elaborate and explain each phase of the methodology, and the achieved results.

2.1 First Phase: Eligibility check

The performance and impact review of online platforms started with the screening of relevant platform landscape on topics such as future climate regional approaches, climate impacts, vulnerabilities and risks in regions, regional mitigation measures, adaptation policies, adaptation options, regional-specific tools, adaptation tools in practice and monitoring, reporting and evaluation. Due to a great deal of work required to produce a significant list of platforms, the whole REGILIENCE team made a joint effort. The results of the screening can be found in Annex I Initial list of Platforms Initial list of Platforms. For the identified platforms, an eligibility test was made. The eligibility test consisted of 3 main questions and several sub-questions that substantiated the answer of each principal one. Following is the list of the questions and sub-questions and the explanation of why those questions were chosen as elimination criteria.

Table 2. Eligibility test

Main question	Sub-questions	Explanation
1. Is the platform available in English?	N/A	To help all regions to develop resilience pathways, the updated platforms need to be usable across Europe and understandable to everyone. Because of that, the English language was set as the first eliminating criterion. It was also assumed that platforms without an English option focus on the local situation and would not be interested in broadening their area of influence.

2. Does the platform provide significant added value?	<p>Does the platform provide any of the following?</p> <ul style="list-style-type: none"> • Proprietary tools useful for the REGILIENCE target audiences • Meaningful brokerage/interaction features • The ability for users to upload and share original content relevant to the REGILIENCE target audiences • Original analysis, assessments, or other relevant original data • Other added value, explain 	<p>The intention of this question was to eliminate the platforms used for promoting a project, company, or platforms that are not creating their own content. Finding the platforms that provide added value to the users started with choosing the four elements the platforms should have to benefit our target audience.</p>
3. Does the platform have the potential for upscaling?	<p>Does the platform go beyond one country/region/municipality?</p> <p>Does the platform go beyond one sector?</p>	<p>The final question was an extension to the second one: the platforms that provide an added value and excellent tools also need to have wide usability across the EU to fit the needs of the REGILIENCE project. If they are focused only on one region or sector, even if they are excellent platforms, they are not in line with the needs of the REGILIENCE.</p>

2.2 Second Phase: Letters of Cooperation

The second phase aims to assess the platform owners' interest in cooperating with the REGILIENCE project and officially establish relation by signing a Letter of Cooperation. This phase is needed because there is a lot of information that the REGILIENCE team cannot access without the platform owners' support.

In this important step, to make the bridge between the REGILIENCE project and the platform owners, the coordination team of the task (mainly composed of REGEA and F6S) and the contact point from the REGILIENCE team were involved. The email contacts were collected, and a friendly template email with the overview of the cooperation to be sent to the platform owners was prepared. In the email, the REGILIENCE team demonstrated the availability to meet to clarify any doubts or to explain the expected results of the cooperation. Some of the platform's owners expressed interest in meeting with the REGILIENCE team, and afterwards, online meetings were organized for the platforms that requested more information.

To better explain what is expected from the cooperation, a PowerPoint presentation was developed for the meetings and was sent to the platform's owners after the meeting together with the Letter of Cooperation template which can be seen in Annex II Template for the letters of Cooperation. The presentation can be found in Annex III PowerPoint presentation sent to the platform owners. The result of this process was signed Letters of Cooperation (LOC).

The results of the second phase, namely which platforms wanted to meet, which platforms signed the Cooperation letters and how this influenced the final choices, can be seen in the next section “Platform Assessment”.

2.3 Third Phase: Complementary questions

Finally, for the third phase, a questionnaire is created having in count the desk research and distributed to the platforms interested in cooperation. This questionnaire was taken advantage of the EU Survey tool (<https://ec.europa.eu/eusurvey/home/welcome>), which is supported by the European Commission’s ISA² programme, which promotes interoperability solutions for European public administrations.

Its purpose is to understand the platforms better, and the questions are sectioned under 4 dimensions. These 4 dimensions are defined as having in count the literature listed in table 1 of the deliverable. They are the following:

- **Platform Statistics Dimension:** mainly to assess the stakeholder’s engagement and reach. Most of these questions were easily extracted from Google Analytics or another similar tool.
- **Technical Dimension:** to assess the technical features and understand the level of effort to implement improvements. The questions include if the platforms already foresee any updates in the near future and/or any activity which REGILIENCE could support.
- **Contextual Dimension:** this dimension is related with GDPR compliance and Intellectual Propriety registration.
- **Business Dimension:** is included to understand the sustainability of the platform.

The questionnaire is also developed to support the SWOT analysis and clarify some doubts coming from the eligibility done in the first phase of the assessment and the meetings we had with the platform owners.

The questions inside each dimension are shown in the Table 3, Table 4, Table 5, and Table 6

Table 3. Platform Statistics Dimension (For the last year (main page of Google analytics):

NR	TITLE	TYPE OF ANSWER
1	Total page views	Number
2	Total unique visitors	Number
3	Bounce rate	Number (Percentage)
4	Number of users	Number
5	Number of new users	Number
6	Number of sessions	Number
7	Number of sessions per user	Number
8	Page views	Number

9	Number of pages per session	Number
---	-----------------------------	--------

Table 4. Technical Dimension

NR	TITLE	TYPE OF ANSWER
1	Which is the platform Framework?	TEXT
2	Is there any database associated with the platform	YES/NO
3	In your perspective, is it easy to update: <ul style="list-style-type: none"> • Text • Tables • Upload documents/images/videos • Plug-ins 	YES/NO YES/NO YES/NO YES/NO/DEPENDS
4	Is it compliant with any standards?	YES/NO
5	How many plug-ins do the platform already have installed?	PLAIN NUMBER
6	Have you considered updating your platform before the contact of REGILIENCE team? If yes, what were your ideas for the update?	YES/NO TEXT
7	Where do you see REGILIENCE could support your platform the most?	TEXT
8	Are you willing to make any changes on your platform? If yes, which ones?	YES/NO TEXT
9	Would you be interested in adding some REGILIENCE produced content to your platform (if relevant*), namely: <ul style="list-style-type: none"> • Factsheets, • Documents with info related to funding opportunities, • Infographics <p>*REGILIENCE can share the produced content and then you may decide if they are relevant for your platform.</p>	YES/NO YES/NO YES/NO YES/NO

Table 5. Contextual Dimension

#	QUESTIONS	TYPE OF ANSWER
1	In which country is the platform based?	Name of the country
2	Is there information available on how it was funded?	YES/NO
3	Type of data collected	List of type of data
4	Does your platform provide Information to the user on data collection, storage, processing, and transfer?	YES/NO
5	Is there any informed consent?	YES/NO
6	Does your platform provide the used sharing model of data?	YES/NO
7	Is data management ensured?	YES/NO
8	Is the platform registered? - brand, trademark, patent, etc.	YES/NO
9	What is the access model?	Open access/open source/close access

10	Is the platform GDPR compliant?	YES/NO
----	---------------------------------	--------

Table 6. Business Dimension

#	QUESTIONS	TYPE OF ANSWER
1	Is the platform profit?	YES/NO
2	Does the platform have any funding entity behind?	YES/NO
3	How many registered users do the platform have?	Plain number
4	Average cost per year (only in infrastructures, not HRs)	Plain number (€)
5	Is there any associated cost per registered user?	YES/NO
6	Are you willing to buy any plug-in in a near future? If yes, which is the cost? Which is the functionality?	YES/NO PLAIN NUMBER TEXT
7	Are the integrated services being reimbursed/paid?	YES/NO
8	How do you foresee your platform in 5 years?	TEXT
9	Does your platform have any competitors?	TEXT
10	Is your target market shrinking or shifting?	TEXT

The answers received from the platforms will be analysed in more detail in the scope of this document, which will result in choosing the platform(s) that will be updated and supported by the project.

2.4 Fourth phase and further steps

This report ends with the Fourth phase, namely choosing the platforms to cooperate with us, and explaining why they are the most suitable for the work we are producing under the project. The next chapter presents the methodology application and results.

Between the fourth and the fifth phases, that is, after choosing the final platforms and before implementing the suggested updates on them, the REGILIENCE team will search for the best ways to support them. Moreover, the team will search for solutions to deepen the cooperation with Climate ADAPT for our mutual benefit.

Finally, the sixth phase will start with the online platform(s) receiving the initial 10 requests, which could be, for example, downloads of factsheets, a plea for support, or clarifications through the platforms.

3 Platforms Assessment

3.1 Top-down review

Screening relevant platform landscape topics related to climate resilience resulted in 124 identified platforms. For each platform, the eligibility test was made. 93 platforms passed the first elimination criterion. The ones that did not pass it are either not in English or are not online at the moment. 37 platforms contained added value and therefore passed the second criterion. Furthermore, of those 37 platforms, 16 showed potential for upscaling.

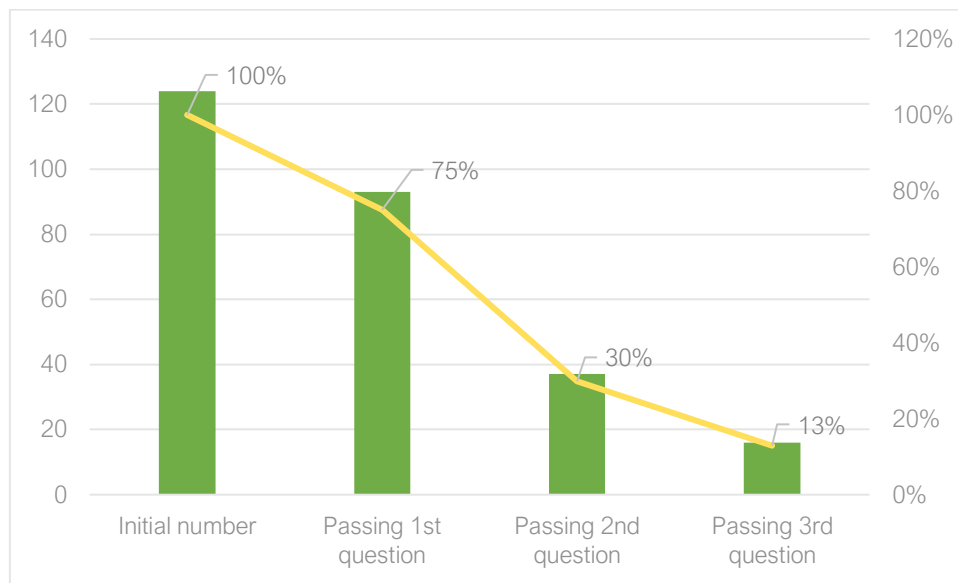

Figure 2. Number and percentage of platforms "passing" each question

Therefore, the result was 16 platforms that were the most suitable to assist regions in implementing resilience pathways and could serve as a knowledge tool for regions if updated in cooperation with the REGILIENCE project. The process of assessing each platform question per question can be found in Annex IV First phase of Platform's Assessment.

3.2 Evaluation of interest to participate

After the 16 platforms were selected, a cooperation proposal was sent to them via email. The email contained more data about the REGILIENCE project and the cooperation that was being proposed. The online platforms were kindly asked to express their interest in cooperation within 10 days. Out of 15 platforms, meetings were held with 8 of them, while 1 declined the proposal, and 6 did not express willingness to cooperate. The final result is 6 signed Letters of Cooperation (LOC). Table 7 shows the list of the 16 platforms that passed the Eligibility test with marked platforms that signed the LOC.

Table 7. List of Online Platforms that passed the 1st phase of the eligibility check

The PreventionWeb platform is not interested in updates and thus did not sign the LOC. However, the platform owners invited us to register, which we did, and some REGILIENCE news and articles have already been disseminated in the PreventionWeb Newsletter and platform.

4 Survey results

This chapter presents the most critical questions and their answers.

Since this is a public report, it was decided not to use the platform's name, but numbering them instead.

For the REGILIENCE project, the total page views (Figure 3) and the number of users (Figure 4) are essential information since it shows the number of viewers that the knowledge shared through the project would reach. One of the platforms has by far the highest number of page views (323,667) and the highest number of users (149,631). Of the remaining four that answered the questions, one has a slightly higher number of views (56,947) and the number of users (21,090), while the rest have similar values in the page views, while the number of users varies.

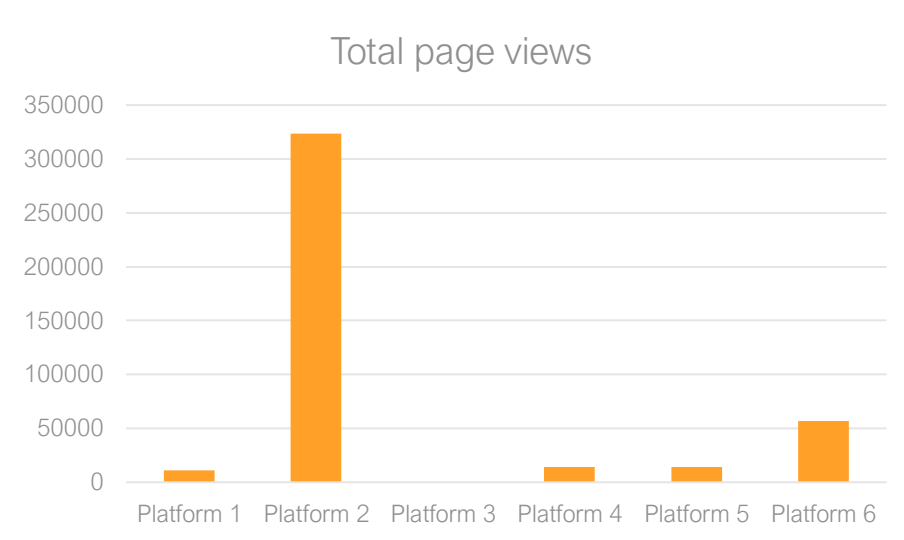

Figure 3. Total page views

Figure 4. Number of users

An interesting observation is the number of registered users. Although Platform 2 again leads with the numbers, on the second place is Platform 1 (Figure 5).

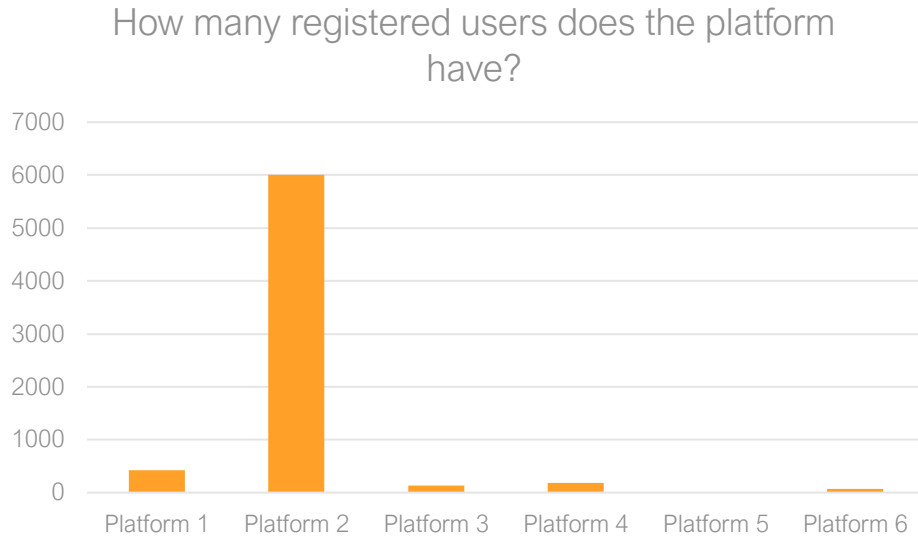

Figure 5. Number of registered users

Following information that is quite important is the bounce rate, the percentage of visitors to a particular website who navigate away from the site after viewing only one page. Platform 4 has the lowest bounce rate, followed by Platform 3 (Figure 6).

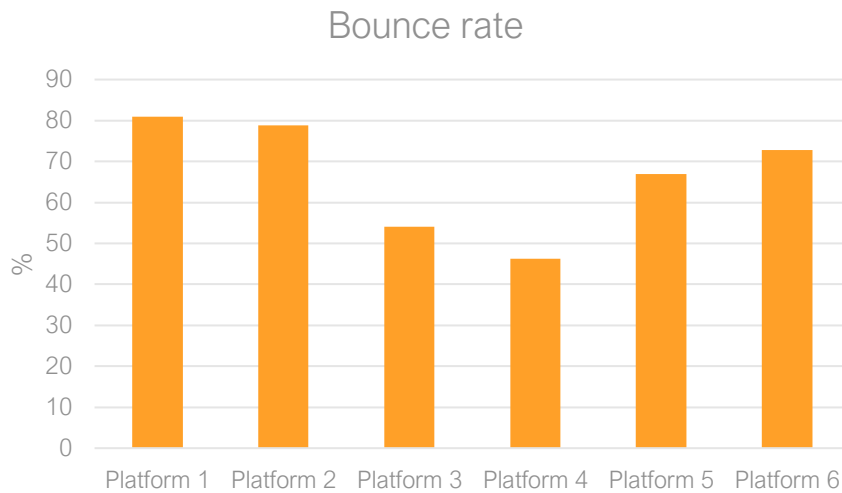

Figure 6. Bounce rate

All the platforms are willing to make changes on their platforms, which is crucial information that allows for the existing cooperation to continue and for the platform to be updated in cooperation with the REGILIENCE project. The changes they are willing to make can be seen in Table 8. The answers will be used to plan the possible updates for the platforms, which will be discussed further with the platforms in Phases 4 and 5.

Table 8. Platform update possibilities

	Are you willing to make any changes to your platform?	If yes, which ones?
Platform 1	Yes	Connectivity with other platforms
Platform 2	Yes	We have a planned upgrade, so it would be great if it could create synergies with that.
Platform 3	Yes	If the ways to finance it are solved, it is possible to improve the platform according to the best ideas.
Platform 4	Yes	To be determined.
Platform 5	Yes	The changes can be related to the available content, but no significant structural changes.
Platform 6	Yes	Minor edits, such as modifications of articles, etc., are fine. Changing the code and website structure might be difficult

For the planning of the updates, it is important to know how easy it is to change some aspects of the platform. All platform owners believe that it is easy to update the text and upload documents, images, and videos on their platforms, which is not the case for tables and plug-ins (Table 9).

Table 9. The possibility of updating the certain elements

	From your perspective, is it easy to update:			
	Text	Tables	Upload documents, images, and videos	Plug-ins
Platform 1	Yes	Yes	Yes	Depends
Platform 2	Yes	No	Yes	Yes
Platform 3	Yes	No	Yes	Depends
Platform 4	Yes	Yes	Yes	No
Platform 5	Yes	Yes	Yes	Depends
Platform 6	Yes	Yes	Yes	Depends

The interest in adding REGILIENCE-produced content to the platform was also checked. All but one platform showed interest, as seen in Table 10. Interest do add REGILIENCE produced content.

Table 10. Interest do add REGILIENCE produced content

	Would you be interested in adding some REGILIENCE-produced content to your platform (if relevant*), namely:		
	Factsheets	Documents with info related to funding opportunities	Infographics
Platform 1	Yes	Yes	Yes
Platform 2	Yes	Yes	Yes
Platform 3	Yes	Yes	Yes
Platform 4	No	No	No
Platform 5	Yes	Yes	Yes

Platform 6	Yes	Yes	Yes
------------	-----	-----	-----

Finally, for the efforts put into the platform upgrades to not be in vain, an important question is where the platform owners foresee their platforms in 5 years. All of the platforms will be available to the public. Some platforms hope for new content extensions, while others desire further growth (Table 11).

Table 11. Platforms in 5 years

	How do you foresee your platform in 5 years?
Platform 1	More interlinked and expanded with new content and more detailed categorization.
Platform 2	Growing further, hopefully, but maybe more mobile-based.
Platform 3	With additional EU financing -a continuation, it could be developed further.
Platform 4	Growth of Regions participation. In terms of technology, it would be more robust, automated, and interactive.
Platform 5	The website will be enriched with additional information and materials produced until February 2025. After this date, the site will remain available to the public. In addition, a digital interface will be developed using existing material that will guide visitors into the steps of a Capacity building programme.
Platform 6	Grow Members Hub and EU Projects space - keeping the website up-to-date regularly (+ further increase in visitors and members)

5 SWOT analysis

5.1 Platform 1

Platform 1 is dedicated to innovation that can tackle climate change challenges. On the homepage, visitors are invited to share their innovations and can browse the existing ones. It is possible to go through all innovations at once or filter them by hazards or topics. When choosing an innovation, the visitor is redirected to the page where more information about it can be found. On that page, directly contacting the investor or leaving a comment is possible. An interesting observation is that although the platform has the lowest number of visitors, it has the second-largest number of registered users. It is focused on a wide spectrum of stakeholders, from innovators themselves to people who are searching for innovative solutions and would like to implement them. The main focus of the platform is to connect innovators with possible clients and help to speed up the climate change adaptation process.

Platform 1 would be relatively easy to update to fit the needs of the REGILIENCE project if possibilities to add more diverse content were introduced. The platform owners are willing to add REGILIENCE-produced content that would be relevant for them; thus, it shows potential for further cooperation.

Table 12. Platform 1 SWOT analysis

Strengths	Weaknesses
<ul style="list-style-type: none"> • The platform collects solutions to climate challenges • Availability of a search option • Availability of a login option • Availability of a database • The second-largest number of registered users • Easy to navigate on the platform • It is relatively easy to update 	<ul style="list-style-type: none"> • The lowest number of visitors • High bounce rate • It is still not a popular platform
Opportunities	Threats
<ul style="list-style-type: none"> • Possibilities to add more diverse content to the platform • Willingness to add REGILIENCE-produced content • The target market (innovators/ implementors) is growing 	<ul style="list-style-type: none"> • Not registered, which means that its content can be stolen

5.2 Platform 2

Platform 2 is an open space on climate change challenges. It allows the users to access credible, high-quality information and to share experiences and lessons learned with the community. The home page contains an introduction to the platform, below which are Highlights and News, as well as the latest content and discussions. One of the most exciting features found on the platform is

the Adaptation Layer, that is, a global map plotted with climate adaptation projects. The path to learning possibilities and sharing knowledge can be found at the top and the bottom of the homepage. Although the platform has a high bounce rate, since it has by far the largest number of visitors, it is expected that a significant number of visitors spend some time researching the data on the page. Although the platform is intended for practitioners, researchers and policy makers, everyone interested in the topic of climate change adaptation can learn from it.

Platform 2 already contains most of the features that REGILIENCE is searching for. Further possibilities would be to add an e-learning option or links to webinars with climate adaptation topics. The possible synergies with the planned updates would need to be discussed with the platform owners.

Table 13. Platform 2 SWOT Analysis

Strengths	Weaknesses
<ul style="list-style-type: none"> • Well known platform • Possibility to choose between a wide variety of languages • Availability of a global map with plotted climate adaptation projects • The most visitors • The most page views • Availability of a database • Availability of a search option • Availability of a log in option • Ensures data management • Registered platform 	<ul style="list-style-type: none"> • High bounce rate
Opportunities	Threats
<ul style="list-style-type: none"> • Willingness to add REGILIENCE-produced content • Easy to incorporate REGILIENCE-produced content without too many changes on the platforms 	<ul style="list-style-type: none"> • Willingness to update the platform only if we can create synergies with the platform's planned updates

5.3 Platform 3

Platform 3 is organized as a forum, and the focus is on the members' communication. It has one page, which contains a place to post your idea, below which are the latest post. Visitors can filter the posts of their interest by the topics or the keywords. Besides the posts, the platform has some educational pictures, videos, and documents. The platform focuses on five different stakeholder groups: Public authorities, Industry, Academia, NGOs, and Citizens.

Platform 3 would need the most upgrades of all the platforms to fit the needs of the REGILIENCE project. This, next to the fact that the platform is not being maintained since the project in the scope of which the platform has been created has ended, makes the platform a weak fit for the upgrade.

Table 14. Platform 3 SWOT Analysis

Strengths	Weaknesses
<ul style="list-style-type: none"> • The platform is encouraging the communication between users and knowledge exchange • The second smallest bounce rate • Availability of a search option • Availability of a login option 	<ul style="list-style-type: none"> • A small number of users • No database • Unmoderated/ unmaintained
Opportunities	Threats
<ul style="list-style-type: none"> • High potential to be transformed into an e-learning platform 	<ul style="list-style-type: none"> • Difficulties to transform the platform to fit the needs of the REGILIENCE project

5.4 Platform 4

Platform 4 is more than 20 years old platform that was formed with a vision to encourage investors, companies, cities, states, and regions to manage their environmental impacts by measuring and acting on them. It has more than 1200 cities reporting through it. All the data the cities report is publicly available and can be easily browsed for the topics of interest. The data site is a separate site on which all sorts of data can be found. It also has a world map with case studies pinned to the cities for which they were made.

In general, Platform 4 is a successful platform that is well-developed and has great use for its users. Nevertheless, since data sharing is allowed only for reporting, and the platform owners are not interested in sharing REGILIENCE-produced content, it is hard to update or improve their platform. However, they are very interested in taking part in the REGILIENCE events (being mainly invited as a speaker), the process of engagement of regions and cities, and dissemination actions. They are interested as well in disseminating joint activities in their social media channels and as a news post on their platform.

Table 15. Platform 4 SWOT Analysis

Strengths	Weaknesses
<ul style="list-style-type: none"> • The platform is well developed, and it is easy to navigate through it • Easy to find the desired knowledge • Lowest bounce rate • Availability of a database • Availability of a login option 	<ul style="list-style-type: none"> • Impossible to share REGILIENCE produced content on the platform
Opportunities	Threats
<ul style="list-style-type: none"> • Dedication to helping investors, companies, and cities to build a sustainable economy by measuring and acting on their environmental impact 	<ul style="list-style-type: none"> • Not interested in applying communication possibilities • Not interested in sharing REGILIENCE-produced content

5.5 Platform 5

Platform 5 is a platform created in the scope of a project currently undergoing and will end in 2025. The project's focus, and thus also of the platforms, is capacity building for cities and regions. It serves as a tool to invite public authorities to apply for capacity building. It contains reports and learning handbooks created by the project, replicable practices, a glossary of financial terms, and a financial indicators calculator as well as webinars that were hosted by the project.

Besides the missing login option and the missing possibility to allow visitors to communicate with each other, the platform matches what the REGILIENCE team is searching for quite well. Nevertheless, the end of funding and platform maintenance in 2025 is an issue that would need to be addressed before further communication could start.

Table 16. Platform 5 SWOT Analysis

Strengths	Weaknesses
<ul style="list-style-type: none"> • The platform has an e-learning program already incorporated and is based around it • Nicely designed • Easy to navigate through the platform and find data • Availability of a database • Availability of a search option 	<ul style="list-style-type: none"> • Lack of Adaptation oriented actions • Missing a login option
Opportunities	Threats
<ul style="list-style-type: none"> • Easy to adjust to REGILIENCE-produced content • Willingness to add REGILIENCE produced content 	<ul style="list-style-type: none"> • It is a project platform, and so far, there are no plans to continue maintaining it after 2025 • No funding availability after 2025.

5.6 Platform 6

Platform 6 is a springboard for creating new agencies and a crossroad for a wide array of agencies. On the homepage, access to the latest news and publications can be found. Besides providing the information about projects in which the platform owner participates and the availability of policy documents, this section also contains good practices and publications, which can be filtered by several categories. Finally, it provides a list of completed webinars and information on upcoming events.

The design and content of Platform 6 contains almost everything REGILIENCE is searching for in a platform. Nevertheless, the fact that the platform is designated for a single stakeholder (policy-makers), and it is difficult to become a member of the platform, this could potentially be an obstacle for further cooperation.

Table 17. Platform 6 SWOT Analysis

Strengths	Weaknesses
<ul style="list-style-type: none">• The second largest number of visitors and users• Availability of a database• Availability of a search option• Availability of a login option• Contains a list of upcoming webinars relevant to the topic	<ul style="list-style-type: none">• One has to be a part of a member hub to log in• Impossible to communicate on the platform
Opportunities	Threats
<ul style="list-style-type: none">• Assurance that the REGILIENCE-produced content will reach its members• Willingness to add REGILIENCE produced content	<ul style="list-style-type: none">• A platform dedicated to a single kind of stakeholders

6 Recommendations for future steps

Platforms analysed in the scope of this document are among the sixteen platforms that passed the eligibility test done in Phase 2. Thus, it is not strange that all of them are great platforms in which the REGILIENCE team would be happy to cooperate. After conducting a detailed analysis and discussion among the partners, two platforms stuck out as the platforms with the most potential for cooperation in the long run. Although Platform 5 is excellent, and REGILIENCE would love to see its content shared on the platform, investing more than that in the platform would be risky due to the end of the platform maintenance in 2025. For a similar reason, Platform 3 is also not seen as an option because it would need too many updates to fit the REGILIENCE needs, which is impossible for a page without maintenance. Finally, although the work done through Platform 4 by the impressive team, but with all the restrictions to the platform's content, it is hard to imagine how the platform could adjust to fit the REGILIENCE needs. The same is true for platform 6 due to a single specific stakeholder that the platform is dedicated to.

This leaves us with two platforms that show great potential for cooperation which are Platform 1 and Platform 2. Both are willing to share REGILIENCE-produced content if relevant for them and are open to updates that could serve our mutual benefits. The initial idea is that more content is added to Platform 1, while Platform 2 is made more user-friendly with more interactive content and a possibility to shift to mobile-based. The mentioned updates are suggestions and will be further discussed with the online platforms to find the best solution for everyone.

7 Conclusion

This document aims to analyse the possible platforms and choose the one(s) that can be set up as a knowledge tool for regions to assist them in implementing resilience pathways. There are altogether four phases dedicated to choosing the right platforms, all of which are presented in Chapter 2, Methodology and Approach. Chapter 3, Initial Assessment, goes into the first two phases and shows the decisive criteria for choosing the final sixteen platforms, that were contacted with a cooperation proposal, which led to the signing of six Letters of Cooperation. In the survey results, the most important answers of the platforms are presented, which helps to conduct the SWOT analyses done in the scope of Chapter 5. The conclusions made in the SWOT analyses were then presented in the Recommendations for future steps in which two platforms were identified as having the most potential for being updated that is beneficiary for both the platform owners and the REGILIENCE project.

Throughout all the phases, the REGILIENCE team carefully analysed the data collected and planned for further steps accordingly. The online meetings held with the platform owners were a significant part of the analysis. These meetings have helped the team to understand the plans for the future development of the platforms and to start thinking in advance about how those plans can satisfy REGILIENCE needs. Furthermore, the meetings established an early connection with the platform owners and increase our understanding with the platform and their way of thinking, which will support the continuous fruitful cooperation. The survey was also essential to the analysis since it assisted in comparing the platforms and ensuring that the decisions taken fit the project's needs best. Platform 1 and Platform 2 are willing to share REGILIENCE-produced content if relevant for them and are open to updates that could serve our mutual benefits. The initial idea for the updates is mentioned within Chapter 6 but will be further discussed with the platforms to find the best solution for everyone.

Annex II Template for the letters of Cooperation

<company or institution logo>
<Name, Title and Address>

<Date>

To Whom It May Concern:

As the <position> at <institution> I am greatly interested in the activities and potential future engagement, as well as the outcomes proposed by the REGILIENCE project.

The REGILIENCE project offers numerous potential benefits that complement the <platform name> organizational strategy, including the promotion of an interdisciplinary approach with a repository of best practice climate resilience actions within the European regions, the promotion and dissemination of capacity building activities, and the leveraging of the platform adoption/exploitation as a referenced place that gathers the community and stakeholders supporting the Green Deal targets and communication.

We intend to cooperate with the REGILIENCE team in the phase of the platform assessment by providing inputs for the:

- Internal assessment of the platform's elements, content and functionalities;
- External assessment on the basis of web statistics and surveys provided by the platform holder if available;
- Ad-hoc feedback from direct communication with the platform holders.

With this in mind, we hereby express our strong interest in REGILIENCE project, as it is in our interest to follow its activities closely and participate in actions when feasible. If selected, we intend to cooperate with the REGILIENCE consortium in the process of upgrading and updating the platform <platform name>.

Best regards,

<Name, position>

Annex III PowerPoint presentation sent to the platform owners

EUROPEAN UNION EU MISSIONS

Climate Change Adaptation Mission Objectives

Overall objective: to help at least 150 European regions and communities towards climate resilience by 2030

4

EUROPEAN UNION EU MISSIONS

EU Adaptation Strategy & Mission Adaptation

Adaptation Strategy objectives	Mission contribution
1. Smarter adaptation	<ul style="list-style-type: none"> Contributing to climate data through regions and communities Boosting JRC Data Risk Hub and Climate-ADAPT
2. More systemic adaptation	<ul style="list-style-type: none"> Supporting regions in taking a systemic approach Fostering collaboration between regions and cross-border demonstration of solutions Promoting nature-based solutions
3. Faster adaptation	<ul style="list-style-type: none"> Supporting development, testing and scale-up of innovative solutions Supporting demonstrations of systemic transformations Developing a common framework for climate risk assessment for regions and communities
4. Stepping up international action	

3

Sharing the most promising solutions supporting communities and regions across Europe to become more resilient to climate change

- Supporting communities, cities and regions in their efforts towards building climate-resilient pathways.
- Facilitating the identification and upscaling of the most promising resilience solutions:
 - Supporting their **replication in 10 vulnerable and low-capacity regions**;
 - Building **knowledge tools**: financing, citizen resilience scan, adaptation,...;
 - Communicating through various channels and **+/- 700 actions**; and
 - Inspiring policymakers, organisations, and individuals to become part of the change.

<https://regilience.eu/>

REGILIENCE

Demonstrator regions

- So far 22 (NUTS2, NUTS3 or smaller communities)
- Additional 1+10 replication regions
- Reflect different climate risks and biogeographic areas
- Will test different types of solutions

ARSINOE: Building an ecosystem of innovative climate change adaptation solutions

High level objective: Climate resilient-regions through systemic solutions and innovations

ARSINOE's three tier solution:

SYSTEMS INNOVATION APPROACH
SIA addresses the growing complexity, interdependencies and interconnectedness of modern societies and economies. It analyses the challenges, recognizes the opportunities and designs solutions.

CLIMATE INNOVATION WINDOW
CIW is the EU reference Innovations marketplace for climate adaptation technologies.

ECOSYSTEM FOR CLIMATE CHANGE ADAPTATION SOLUTIONS:
Pathways to solutions are co-created and co-designed by stakeholders to form an innovation package for resilience to climate change.

RESILIENCE KNOWLEDGE BOOSTERS

Human dimension:

- Stakeholder engagement & co-creation

Digital dimension:

- Innovative tools & data visualisations
- Quality, scalable, interconnected systems

ACTIVITIES INCLUDE:

- Test solutions
- MOOC, events, virtual tours to share learning & results
- Define methods, metrics, pathways
- Brief business, finance sector, policy-makers
- Assess tipping points, risks
- Build relationships, impact, legacy beyond the project

32 partners | 9 countries

Accelerating and upscaling transformation adaptation in Europe

Demonstration of water-related demonstration packages

Objectives

- ◆ Communicate the Transformational Adaptive Blocks across any regions or community in Europe wanting to tackle TA.
- ◆ Deliver user-friendly, accessible and comprehensive multi-sector dynamics data services relevant to transformational adaptation and its water-related challenges and fit the needs of public and private.
- ◆ Test the potential of specific innovations to enable rapid and far-reaching change in the resilience of demonstrators.
- ◆ Accelerate investment for TA across the EU by means of demonstrating bankability and innovative financial schemes.
- ◆ Consolidate a catalogue of solutions and IPs, associated guidance documents, and an understanding of the acceptance and preference of citizens of solutions for transformational adaptation.

This project has received funding from the European Union's Horizon 2020 innovation action programme under grant agreement 101019660.

Platform(s) aims and goals

Setting up an online platform that will act as a knowledge tool for regions to assist them in implementing resilience pathways, as stimulated by the Innovation Packages, and will be viewed as a knowledge management platform for existing programmes

The platform should:

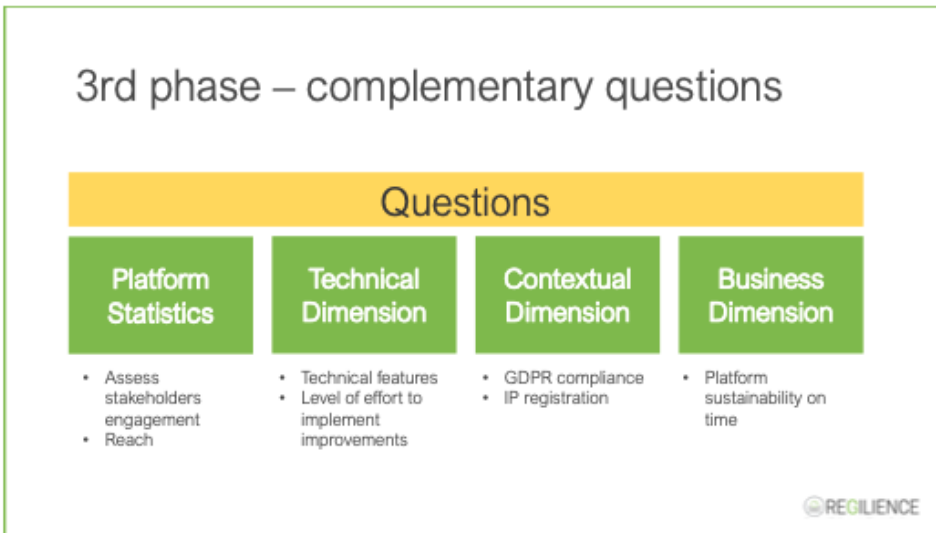

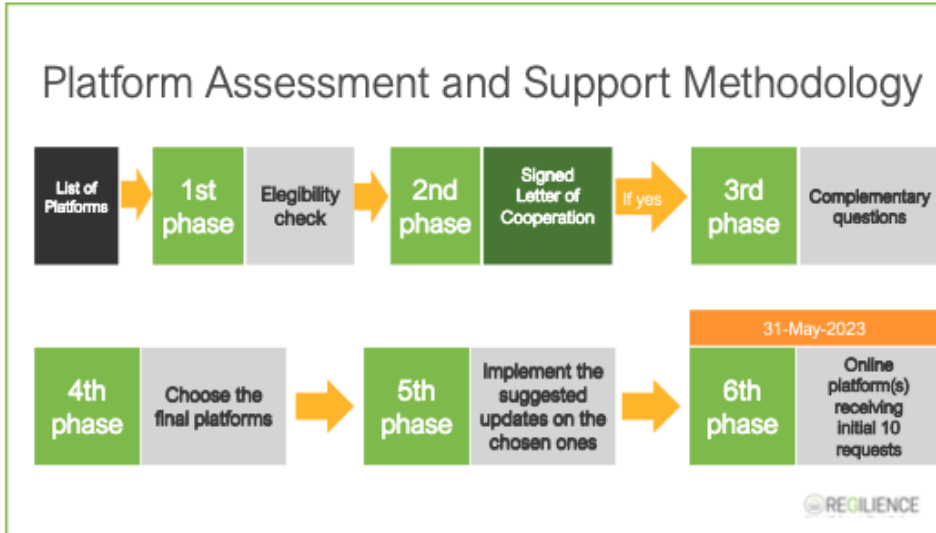

- host the tools for engagement of stakeholders;
- host materials and supporting media items for the capacity building activities of the regional authorities;
- and a broad range of customized tools for citizens engagement;

For example:

- Platform registered users of members can add resources related to their programme and share them with other users;
- Allow view resources uploaded by other users;
- Add and search the best regional climate practices programmes;
- Add and search the most relevant programme documents;
- Present regional climate events;
- Invite colleagues to join our platform solution;
- Share presentations and documents;
- Link the workspace of the platform to other programmes.

Platform Assessment and Support Methodology

38

Annex IV First phase of Platform’s Assessment

1. PentaHelix Climate Forum

PLATFORM IDENTIFICATION CARD		Logotype
Name	PentaHelix Climate Forum	 PENTAHELIX
Link	https://pentahelix.eu/hr/climate-forum-7/	

Eligibility check questions

*The assessment stops when the answer is “no”.

1. Is the platform available in English? Yes No

2. Does the platform provide significant added value? Yes No

If the platform has, at least, the first 4 squares marked, the assessment is “yes”

Does the platform provide any of the following?

- Proprietary tools useful for the REGILIENCE target audiences
- Meaningful brokerage/interaction features
- Ability for users to upload and share original content relevant to the REGILIENCE target audiences
- Original analysis, assessments, or other relevant original data
- Other added value, explain:

Brief comment if relevant:

3. Does the platform have potential for upscaling? Yes No

If the platform has the 2 squares marked, the assessment is “yes”

- Does the platform go beyond one country/region/municipality?
- Does the platform go beyond one sector?

Brief comment if relevant:

2. Association of European Border Regions (AEBR)

PLATFORM IDENTIFICATION CARD	
Name	Association of European Border Regions (AEBR)
Link	https://www.aebr.eu/
Logotype	

Eligibility check questions

*The assessment stops when the answer is "no".

1. Is the platform available in English? Yes No

2. Does the platform provide significant added value? Yes No

If the platform has, at least, the first 4 squares marked, the assessment is "yes"

Does the platform provide any of the following?

- Proprietary tools useful for the REGILIENCE target audiences
- Meaningful brokerage/interaction features
- Ability for users to upload and share original content relevant to the REGILIENCE target audiences
- Original analysis, assessments, or other relevant original data
- Other added value, explain:

Brief comment if relevant:

The platform focuses on the promotion of AEBR activities

3. Does the platform have potential for upscaling? Yes No

If the platform has the 2 squares marked, the assessment is "yes"

- Does the platform go beyond one country/region/municipality?
- Does the platform go beyond one sector?

Brief comment if relevant:

3. Assembly of European Regions (AER)

PLATFORM IDENTIFICATION CARD	
Name	Assembly of European Regions (AER)
Link	https://aer.eu/tag/climate-change/
Logotype	

Eligibility check questions

*The assessment stops when the answer is “no”.

1. Is the platform available in English? Yes No

2. Does the platform provide significant added value? Yes No

If the platform has, at least, the first 4 squares marked, the assessment is “yes”

Does the platform provide any of the following?

- Proprietary tools useful for the REGILIENCE target audiences
- Meaningful brokerage/interaction features
- Ability for users to upload and share original content relevant to the REGILIENCE target audiences
- Original analysis, assessments, or other relevant original data
- Other added value, explain:

Brief comment if relevant:

3. Does the platform have potential for upscaling? Yes No

If the platform has the 2 squares marked, the assessment is “yes”

- Does the platform go beyond one country/region/municipality?
- Does the platform go beyond one sector?

Brief comment if relevant:

4. CARISMA

PLATFORM IDENTIFICATION CARD		
Name	CARISMA – Innovation for Climate Change Mitigation	Logotype
Link	http://carisma-project.eu/	

Eligibility check questions

*The assessment stops when the answer is “no”.

1. Is the platform available in English? Yes No

2. Does the platform provide significant added value? Yes No

If the platform has, at least, the first 4 squares marked, the assessment is “yes”

Does the platform provide any of the following?

- Proprietary tools useful for the REGILIENCE target audiences
- Meaningful brokerage/interaction features
- Ability for users to upload and share original content relevant to the REGILIENCE target audiences
- Original analysis, assessments, or other relevant original data
- Other added value, explain:

Brief comment if relevant:

3. Does the platform have potential for upscaling? Yes No

If the platform has the 2 squares marked, the assessment is “yes”

- Does the platform go beyond one country/region/municipality?
- Does the platform go beyond one sector?

Brief comment if relevant:

5. CDP Europe

PLATFORM IDENTIFICATION CARD	
Name	CDP Europe
Link	https://www.cdp.net/en
Logotype	

Eligibility check questions

*The assessment stops when the answer is “no”.

1. Is the platform available in English? Yes No

2. Does the platform provide significant added value? Yes No

If the platform has, at least, the first 4 squares marked, the assessment is “yes”

Does the platform provide any of the following?

- Proprietary tools useful for the REGILIENCE target audiences
- Meaningful brokerage/interaction features
- Ability for users to upload and share original content relevant to the REGILIENCE target audiences
- Original analysis, assessments, or other relevant original data
- Other added value, explain:

Brief comment if relevant:

3. Does the platform have potential for upscaling? Yes No

If the platform has the 2 squares marked, the assessment is “yes”

- Does the platform go beyond one country/region/municipality?
- Does the platform go beyond one sector?

Brief comment if relevant:

6. Clarity

PLATFORM IDENTIFICATION CARD	
Name	Clarity
Link	https://clarity-h2020.eu/
Logotype	

Eligibility check questions

*The assessment stops when the answer is “no”.

1. Is the platform available in English? Yes No

2. Does the platform provide significant added value? Yes No

If the platform has, at least, the first 4 squares marked, the assessment is “yes”

Does the platform provide any of the following?

- Proprietary tools useful for the REGILIENCE target audiences
- Meaningful brokerage/interaction features
- Ability for users to upload and share original content relevant to the REGILIENCE target audiences
- Original analysis, assessments, or other relevant original data
