Fundo Ambiental aims to promote the Sustainable Development Goals of the Agenda 2030, with environmental focus on: Drinking Water and Sanitation, Sustainable Cities and Communities, Sustainable Production and Consumption, and Climate Action.

Fundo Ambiental (FA) aims to support environmental policies and sustainable development objectives. It contributes to the fulfillment of national and international objectives and commitments relating to climate change, water resources, waste management and the conservation of nature and biodiversity. However, support can be allocated to any sector if the fulfillment of the funds objectives can be justified and considering a cost-benefit analysis.

The Ministry in charge of the environment area has the responsibility to manage the Fundo Ambiental. It's managed through enacted general or specific guidelines within any area of intervention of the Fund, and under direct order of the member of the Government responsible for the environment area.

FA manages its funding opportunities in five different clusters:

- Climate Change Mitigation;
- Waste and Circular Economy;
- Conservation of Nature and Biodiversity;
- Environmental Awareness;
- Forest and Sustainable Forest Management.
